

Renewable & Sustainable Hydro Power Projects By IMP ENERGY LTD. IMP Energy Ltd. has been launched by IMP Powers Ltd.

IMP Powers Ltd. has an impressive order book of Rs. 293 crs as on date and IMP Energy Ltd. has an order book of Rs. 71 crs as on date

Mr. Aaditya R. Dhoot
Jt. Managing Director
IMP POWERS LTD.
Mentor: Transformer division-
IEEMA
Vice Chairman-ELECRAMA 2014

IMP Energy Ltd. has been launched with a clear vision of providing excellence and perfection to explore the emerging opportunities in Hydro Power sector with fresh innovations even in the most difficult terrains.

IMP Energy Ltd. has been launched by IMP Powers Ltd., in its 50th. Year of operation expanding its wings by foraying into complete project management consultancy (PMC) and advisory services for renewable energy sources and thus create, enhance and satisfactorily execute the projects meeting the expectations of not only all its stakeholders but the country's needs in renewable energy. The company, in its initial stages, shall execute small and mini hydro power projects only ranging up to 25 MW.

WATER TO WIRE

In order to realize the full potential of small hydro power plants, the whole value chain from water to wire has to work efficiently. This not only requires high degree of coordination but also the high ended technical expertise and creative thinking. IMP Energy is the only such integrated energy company that serves the entire energy conversion chain with products, solutions and services. For us, the key to success is highest degree of operational execution, knowledge driven innovative approach and most efficient and effective results. As a solution provider, we always present one face to our customer for the entire project. After completion, IMP Energy offers an extensive support network in order to ensure the high availability of maintenance and other services. Thus, by doing so we offer highest grade of operational safety and efficiency.

IMP Powers Ltd.

Vision to reality

In pursuit of excellence, our motto is adherence to stringent quality norms, ethical process standards and imaginative engineering to generate GREEN energy for a cleaner and brighter tomorrow. As per the Managing Director Shri Aaditya R Dhoot, the company's vision is "To be a complete Project Management Solutions provider in the mini and small Hydro Power Sector in India as well as neighboring countries".

Projects never look exactly the same. Local conditions, budget limitations are the determining factors for small hydro power projects. IMP Energy, under the maneuvering precision of Director – Operations, Shri Ajay Sawhney, offers cost-effective solutions of different scope according to customer-specific requirements and capabilities. According to him the company customizes the solutions regarding design and equipment to reach the best solution for each client.

Due to high degree of coordinated channel partners IMP Energy has developed the capability to integrate ideas into innovative solutions. In doing so, Director – Marketing Shri Rajendra Miami feels, the focus always on the goal to maximize efficiency, which transfers into high profitability for us and our clients' altogether.

IMP Energy Ltd., in a small period span of 1 year has bagged good orders from LREDA (Ladakh Renewable Energy Development Agency) and KREDA (Kargil Renewable energy Development Agency). All these projects are at the most challenging mountaneous terrains. The projects are as under :-

PROJECTS AT LEH – LADAKH

(LREDA)

A. Penstock erections work as below – (Erection work of Penstock – inclusive of civil work)

- 2 X 250 KW – MHP at TSATI, Nubra valley, Leh – Ladakh
- 2 X 400 KW – MHP at BOGDANG, Nubra valley, Leh – Ladakh
- 2x400KW–MHPatCHULUNGKHA, Nubra valley, Leh-Ladakh
- 2 X 250 KW – MHP at TURTUK, Nubra valley, Leh-Ladakh

B. Complete Contract On Turnkey Basis For Planning, Design, Engineering, Fabrication, Supply, Transportation To Site, Construction, Erection, Testing & Commissioning (Inclusive of operation and maintenance for 2 years) – As below :-

- 2 X 300 KW – MHP project at SHAYOK, Leh-Ladakh
- 2 X 600 KW – MHP project at WARIS-III, Leh-Ladakh

Projects At Kargil (Kreda)

A. Complete Contract On Turnkey Basis For Design, Construction,

Manufacture, Supply, Erection, Testing & Commissioning. Also Execution Of Power Evacuation, Transmission Line (Inclusive of running and maintenance of the project for 3 years) – AS BELOW

:-

- 2 X 750 KW – SHP project at BAIRASS, Drass, Kargil
- 2 X 750 KW – SHP project at KHANDI, Kargil
- 2 X 750 KW – SHP project at SANGRAH, Kargil

All the above projects are in full swing of operations with a committed Team of engineers and technocrats engaged industriously with just one aim – Timely completion achieving highest of perfection as required. IMP Energy Ltd. now has been considered a preferred company for total solutions in small and mini Hydro Power projects in LREDA, KREDA AND JKEDA.

Thus all in all, IMP Energy Ltd. is all set for a quantum leap delivering project excellence and precision crafted services in small and mini Hydro Power plants in the country.
